

# Kindergarten Learning Resources

## Math

- Practice addition and subtraction with a deck of cards and draw two numbers-then write the addition sentence and solve.
- Count orally by 1s to 100 or more
- Count by 5s and 10s to 100
- Count by 2s to 30 Make flashcards with numbers 1-30
- Mix them up and put them in order
- Use them to practice recognizing numbers
- Challenge yourself and make flashcards to 100! How many can you name? Can you put them in order?
- Write numbers from 1-30 or higher! Can you write to 100 or 200?
- Recognize geometric solids: cube, rectangular prism, cylinder, sphere, and cone. How many edges, corners and faces?

## Art/Games/Memories

- Have your child do a craft with scrap paper and glue
- If you are looking for a fun online sight for your kids to visit to learn how to draw go to youtube.com and type in **Art Club for Kids**. Here you will find MANY directed drawing videos for kids to use their fine motor skills and following directions when learning how to draw.
- Paint, draw, play with playdoh
- play card and board games
- Go for a walk/ride bikes/get outdoors!
- Enjoy this precious time with loved ones...stay positive!

## Language Arts

- Learn to recognize ALL upper/lower case letters and the sounds they make. Mix them up and know them fast! The vowel sounds are so important! /a/ apple, /e/, egg, /i/ insect, /o/ octopus, /u/ umbrella
- Go on a letter/sound hunt around your house. Give your child a letter and they have to go find something that starts with that letter/sound.
- Make uppercase and lowercase flashcards and play memory with your child. In order to get a match they must find the capital and lowercase letters from the game and also tell you the sound. The one with the most matches wins.
- Place the letters mixed up on the floor around the house and have them jump from letter to letter naming them and saying their sounds.
- Practice high frequency words
- Use the provided list to make flashcards
- Try to make sentences using the flashcards
- Sort the cards by beginning letter or by counting syllables
- Look for words in a book or magazine
- Write the words

## Writing

- Remember to sound out/stretch out the sounds you hear in each word. High frequency words should be spelled correctly, so have your list ready to use!
- Use an upper-case letter to start each sentence.
- Make sure to have a space between each word.
- Draw a picture to match your story!
- Use a notebook and write each day what you did for the day, write about places you would like to visit, favorite animals, food, season etc..

## Reading

- Read, Read, Read!
- Parents can read books that are too difficult and students can pick out the sight words and read those
- Students can browse magazines or any other reading medium such as cookbooks when cooking with you.
- Do flashlight reading where your child reads books with a flashlight in a darkish room
- Act out books and perform the story
- Build a fort and get cozy and read a book

Above all please spend time together making memories and caring for one another. That is what is most important in these stressful times. The children need to know this **WILL** all be ok.
